*Preface* ..... vii

*Contents* ..... ix

**Section 1. Inorganic/composite aerogels**

Strengthening of silica gels and aerogels by washing and aging processes
M.-A. Einarsrud, E. Nilsen, A. Rigacci, G.M. Pajonk, S. Buathier, D. Valette, M. Durant, B. Chevalier, P. Nitz and F. Ehrburger-Dolle ..... 1

Effects of supercritical impregnation conditions on the properties of silica–titania aerogels
S. Yoda, K. Otake, Y. Takebayashi, T. Sugeta and T. Sato ..... 8

Electrochemically induced surface modification of titanols in a 'nanoglued' titania aerogel–silica aerogel composite film
J.J. Pietron and D.R. Rolison ..... 13

New sol–gel synthetic route to transition and main-group metal oxide aerogels using inorganic salt precursors
A.E. Gash, T.M. Tillotson, J.H. Satcher Jr., L.W. Hrubesh and R.L. Simpson ..... 22

Modifying nanoscale silica with itself: a method to control surface properties of silica aerogels independently of bulk structure
C.A. Morris, D.R. Rolison, K.E. Swider-Lyons, E.J. Osburn-Atkinson and C.I. Merzbacher ..... 29

Silica aerogel–iron oxide nanocomposites: structural and magnetic properties
Ll. Casas, A. Roig, E. Rodríguez, E. Molins, J. Tejada and J. Sort ..... 37

Preparation of $BaTiO_3$ powders using supercritical $CO_2$ drying of gels
Z. Novak, Z. Knez, M. Drofenik and I. Ban ..... 44

Effective diffusion coefficient in the low temperature process of silica aerogel production
P. Wawrzyniak, G. Rogacki, J. Pruba and Z. Bartczak ..... 50

Synthesis of high porosity, monolithic alumina aerogels
J.F. Poco, J.H. Satcher Jr. and L.W. Hrubesh ..... 57

Effects of the post-synthesis treatment on the structural properties of alumina-doped zirconia
O. Metelkina, N. Hüsing, P. Pongratz and U. Schubert ..... 64

**Section 2. Non-conventional processing of aerogels**

Multiphased assembly of nanoporous silica particles
H. Fan, F. Van Swol, Y. Lu and C.J. Brinker ..... 71

Self-assembled aerogel-like low dielectric constant films
H. Fan, H.R. Bentley, K.R. Kathan, P. Clem, Y. Lu and C.J. Brinker ..... 79

Processing of alumina low-density xerogels by ambient pressure drying
J.W. Frazee and T.M. Harris ..... 84

Preparation of mesoporous $TiO_2$ thin films by surfactant templating
M.M. Yusuf, H. Imai and H. Hirashima ..... 90

Preparation of meso-porous $TiO_2$ gels and their characterization
H. Hirashima, H. Imai and V. Balek ..... 96

**Section 3. Organic–hybrid aerogels**

The use of vinyl functional aerogels for reinforcement of silicone rubbers
J.K. Floess, R. Field and S. Rouanet . . . . . 101
Small-angle X-ray scattering of a new series of organic aerogels
O. Barbieri, F. Ehrburger-Dolle, T.P. Rieker, G.M. Pajonk, N. Pinto and A. Venkateswara Rao . . . . . 109
Sol–gel preparation and in vitro deposition of apatite on porous gelatin–siloxane hybrids
L. Ren, K. Tsuru, S. Hayakawa and A. Osaka . . . . . 116
Synthesis and properties of chitosan–silica hybrid aerogels
M.R. Ayers and A.J. Hunt . . . . . 123
Influence of the organic phase on the properties of $CrO_3$-derived chromia aerogels
T. Skapin . . . . . 128
The use of additives to prepare low-density xerogels
C. Alié, R. Pirard, A.J. Lecloux and J.-P. Pirard . . . . . 135

**Section 4. Aerogel structure and characterization**

Characterization of mesoporous silicas by in situ small angle neutron scattering during isothermal gas adsorption
J.D.F. Ramsay and S. Kallus . . . . . 142
Very large-scale structures in sintered silica aerogels as evidenced by atomic force microscopy and ultra-small angle X-ray scattering experiments
C. Marlière, F. Despetis, P. Etienne, T. Woignier, P. Dieudonné and J. Phalippou . . . . . 148
DLS and SAXS investigations of organic gels and aerogels
S. Berthon, O. Barbieri, F. Ehrburger-Dolle, E. Geissler, P. Achard, F. Bley, A.-M. Hecht, F. Livet, G.M. Pajonk, N. Pinto, A. Rigacci and C. Rochas . . . . . 154
Investigations of silica alcogel aging using coherent light
A.J. Hunt and M.R. Ayers . . . . . 162
Nitrogen sorption in aerogels
G. Reichenauer and G.W. Scherer . . . . . 167
Two fractal structures in aerogel
C. Marlière, T. Woignier, P. Dieudonné, J. Primera, M. Lamy and J. Phalippou . . . . . 175
Small angle neutron scattering characterization of colloidal and fractal aerogels
R.F. Reidy, A.J. Allen and S. Krueger . . . . . 181
Investigation of the multi-scale structure of silica aerogels by SAXS
A. Rigacci, F. Ehrburger-Dolle, E. Geissler, B. Chevalier, H. Sallée, P. Achard, O. Barbieri, S. Berthon, F. Bley, F. Livet, G.M. Pajonk, N. Pinto and C. Rochas . . . . . 187
Surface-treatment chemistry in the manufacture of aerogels: computational modelling of cyclic and linear siloxanes
R.J. Field and E.W. Olson . . . . . 194

**Section 5. Aerogel properties**

Effect of methyltrimethoxysilane as a co-precursor on the optical properties of silica aerogels
A.Venkateswara Rao and G.M. Pajonk . . . . . 202
Carbon aerogels as broadband non-reflective materials
C.I. Merzbacher, S.R. Meier, J.R. Pierce and M.L. Korwin . . . . . 210
Computer simulation of mechanical structure–property relationship of aerogels
H.-S. Ma, J.-H. Prévost, R. Jullien and G.W. Scherer . . . . . 216
Mechanical and acoustical properties as a function of PEG concentration in macroporous silica gels
J. Martin, B. Hosticka, C. Lattimer and P.M. Norris . . . . . 222
Impedance matching and acoustic absorption in granular layers of silica aerogels
L. Forest, V. Gibiat and A. Hooley . . . . . 230
Measurement of attractive forces between single aerogel powder particles and the correlation with powder flow
M. Weth, M. Hofmann, J. Kuhn and J. Fricke . . . . . 236

Mechanical properties of silica aerogels measured by microindentation: influence of sol–gel processing parameters and carbon addition
M. Moner-Girona, E. Martínez, A. Roig, J. Esteve and E. Molins . . . . . 244
Effect of oxidation treatment on the crack propagation rate of aerogels
F. Despetis, S. Calas, P. Etienne and J. Phalippou . . . . . 251
Tunable optical properties of metal nanoparticle sol–gel composites
D.D. Smith, L.A. Snow, L. Sibille and E. Ignont . . . . . 256

**Section 6. Aerogel applications**

Use of surface treated aerogels derived from various silica precursors in translucent insulation panels
W.C. Ackerman, M. Vlachos, S. Rouanet and J. Fruendt . . . . . 264
Skin formation on RF aerogel sheets
R. Petričević, M. Glora, A. Möginger and J. Fricke . . . . . 272
Carbon cloth-reinforced and activated aerogel films for supercapacitors
C. Schmitt, H. Pröbstle and J. Fricke . . . . . 277
Integration of carbon aerogels in PEM fuel cells
M. Glora, M. Wiener, R. Petričević, H. Pröbstle and J. Fricke . . . . . 283
Controlling the pore-solid architecture of mesoporous, high surface area manganese oxides with the birnessite structure
J.W. Long, R.M. Stroud and D.R. Rolison . . . . . 288
Encapsulation of lipases in aerogels
P. Buisson, C. Hernandez, M. Pierre and A.C. Pierre . . . . . 295
Aerogels as biosensors: viral particle detection by bacteria immobilized on large pore aerogel
M. Power, B. Hosticka, E. Black, C. Daitch and P. Norris . . . . . 303
Nickel–alumina composite aerogels as liquid-phase hydrogenation catalysts
D.J. Suh, T.-J. Park, S.-H. Lee and K.-L. Kim . . . . . 309
An experimental investigation of aerosol collection utilizing packed beds of silica aerogel microspheres
M.T. Guise, B. Hosticka, B.C. Earp and P.M. Norris . . . . . 317
Permeability measurement in composite aerogels: application to nuclear waste storage
J. Reynes, T. Woignier and J. Phalippou . . . . . 323
Solvent removal from water with hydrophobic aerogels
L.W. Hrubesh, P.R. Coronado and J.H. Satcher Jr. . . . . 328
Catalyst activity of alumina–galia aerogels for selective reduction of $NO_x$
T. Chono, H. Hamada, M. Haneda, H. Imai and H. Hirashima . . . . . 333
Nanostructured energetic materials using sol–gel methodologies
T.M. Tillotson, A.E. Gash, R.L. Simpson, L.W. Hrubesh, J.H. Satcher Jr. and J.F. Poco . . . . . 338

Author index . . . . . 347

Subject index . . . . . 351
